PROFESSIONAL SUMMARY

Creative and detail-oriented UI/UX Design Engineer and Software Engineering graduate (First Class Honours, BSc Hons, Kingston University, in partnership with ESOFT Metro Campus) with proven experience designing intuitive, user-centered digital products. Skilled across the full design process — from user research and wireframing to high-fidelity Figma prototypes and responsive frontend implementation. Specialist in AI-powered interface design, particularly human-in-the-loop review systems for SaaS products. Actively seeking remote UI/UX junior design roles globally.

KEY SKILLS

UI/UX Design:	User Research, Wireframing, Prototyping, Interaction Design, Visual Hierarchy, AI UX
Design Tools:	Figma, Adobe XD, Miro, Canva, Photoshop
Frontend Dev:	HTML5, CSS3, JavaScript, Bootstrap, Materialize CSS, Responsive Design
UX Methods:	Design Thinking, Empathy Mapping, Persona Development, A/B Testing, Usability Testing
Frameworks:	React (Components, Props & State), Component-based UI
Backend/DB:	PHP, MySQL, REST APIs (supporting knowledge)
Collaboration:	Figma Handoff, Git/GitHub, Notion, Trello, Slack, Zoom
Soft Skills:	Creativity, Attention to Detail, User Empathy, Problem Solving, Adaptability

SELECTED PROJECTS

UI/UX Designer | Zendesk AI — Human Review Interface Redesign

Spec Project · 5 days

- Identified 5 critical UX problems in Zendesk's AI reply suggestion interface through hands-on trial research and competitive analysis
- Designed a 6-screen high-fidelity Figma redesign: confidence scoring badge (High/Medium/Low), one-click Approve & Sendflow, inline editing mode, split-pane layout, and a "Why this suggestion?" transparency panel
- Reduced AI reply approval from 6 steps to 1 click — an estimated 35% faster agent resolution time

UI/UX Designer & Frontend Developer | Velvet Vogue — Fashion E-Commerce Platform

4 weeks

- Designed end-to-end UI for a fashion e-commerce platform, including product catalog, cart, checkout flow, and admin dashboard
- Created high-fidelity Figma prototypes with brand-aligned color systems, typography, and component libraries
- Developed a fully responsive frontend using PHP, MySQL, and Bootstrap, ensuring cross-device compatibility

UI/UX Designer | CareConnect — Doctor Channeling System

3 weeks

- Led the complete UX design for a patient-centered healthcare appointment system serving 3 user types: patients, doctors, and clinic staff
- Developed user personas, empathy maps, and user journey maps, reducing booking from 7 steps to 3 (40% fewer steps)
- Produced wireframes and interactive Figma prototypes with accessibility and ease-of-use as primary design goals

UI/UX Designer | Traveller Planner — Mobile App

3 weeks

- Designed a minimal, modern mobile app prototype using competitive analysis, user interviews, and card sorting
- Introduced a unified “Trip Card” concept — a single view for all booking details — eliminating multi-app switching friction
- Stripped onboarding from 6 screens to 2 after usability testing revealed high drop-off at screen 4

EDUCATION

BSc (Hons) Software Engineering — Kingston University, UK, in partnership with ESOFTE Metro Campus, Sri Lanka (2025–2026, First Class Honours)

Higher National Diploma — Software Engineering | ESOFTE Metro Campus, Sri Lanka (2023–2025, Merit - Focus: UI/UX Design, Web Development, Software Engineering)

Diploma in Information Technology | ESOFTE Metro Campus, Sri Lanka (2022–2023, Distinction)

KEY COMPETENCIES

• End-to-End UX Design Process	• High-Fidelity Figma Prototyping
• AI UX Design & Human-in-the-Loop Systems	• Design Systems & Component Libraries
• Responsive & Mobile-First Design	• User Research & Usability Testing
• Frontend HTML/CSS/JS Implementation	• Remote-Ready & Global Collaboration
